LAZER X RC

BY MOTION INDEX DRIVES

Capabilities

- 1.5 meters per second
- Standard accuracy - DIN 6 on gear rack +/-0.0003"/ft
- Rack is hardened and ground
- Transfer unit is fabricated and machine welded steel construction
- Transfer carriage manufactured to mount customer robot
- Equipped ready to accept any robot brand servo motor

Designed to Meet Customer Specifications Efficiently as Possible

- By utilizing a direct drive gear reducer and gear rack, we achieve higher accuracy and better performance with less components.
- The robust tubular steel construction is designed for easy maintenance, accessibility and ability to add on length at a future date
- Oversized linear bearings guideways enable it to handle more mass as the integrated internal cable carrier reduce floor space consumption

Includes

- High Precision linear rails/guideways with blocks
- Cable management and cable management tray (to be mounted externally or internally by Motion)
- Hard stops on each end of transfer for overtravel
- Leveling bolts, weld brackets and leveling plates
- Special coating to reduce friction and eliminate external lubing
- Installation support by Motion Index Drives at customer facility & if required at the customer site during install

Custom Features

- Length
- Multiple Robot Carriages
- Motor Brands
- Cable Tray Location
- Color
- Low Profile
